PROFESSIONAL SUMMARY

Research Analyst and Monitoring & Evaluation professional with over 4 years of experience supporting research, evaluation, data collection, analysis, reporting, and evidence-based decision-making across development, financial services, energy, governance, health, and consumer markets.

Experienced in managing research assignments from planning to reporting, including study design, questionnaire development, digital survey programming, fieldwork coordination, data quality checks, data analysis, and presentation of findings. Skilled in both quantitative and qualitative research methods, including national surveys, impact evaluations, public opinion research, FGDs, KIIs, CATI studies, and stakeholder consultations.

Strong ability to supervise field teams, manage timelines, maintain data quality, resolve fieldwork challenges, and translate research findings into clear reports, presentations, and actionable insights for clients and management.

AREAS OF EXPERTISE

- Quantitative and Qualitative Research
- Research Project Planning and Coordination
- Survey Design and Questionnaire Development
- CAPI, CATI and CAWI Research
- Public Opinion and Governance Research
- Market and Consumer Insights
- Impact Evaluation and M&E
- Data Analysis using SPSS and Advanced Excel
- Data Quality Audits, Validation and Back-checks
- Fieldwork Coordination and Team Supervision
- Client Reporting and Presentation of Findings
- Report Writing and Data Storytelling
- Stakeholder and Client Engagement
- Proposal Support and Research Design
- Training of Enumerators and Research Assistants

PROFESSIONAL EXPERIENCE

Independent Consultant – Research, M&E & Data Systems

2024 – Present

- Design and support research and M&E frameworks for NGOs, development programmes, and private sector assignments.

- Conduct data quality audits and provide practical recommendations to improve data accuracy, reporting quality, and use of evidence.
- Support clients and programme teams to generate insights that inform planning, programme improvement, and strategic decision-making.
- Facilitate capacity-building sessions on data collection tools, data quality, analysis, and reporting systems.
- Support improvement of data systems, reporting workflows, and research processes to make data collection and reporting more efficient.

TIFA Research

Research Assistant

May 2024 – Present

- Support end-to-end research projects across financial services, governance, energy, development, and consumer sectors.
- Participate in research planning, study design, questionnaire development, sampling support, and fieldwork preparation.
- Design and deploy surveys using SurveyToGo, CATI, ODK and other digital data collection platforms.
- Coordinate field teams and ensure projects are completed within agreed timelines and quality expectations.
- Supervise research assistants and enumerators during training and fieldwork, ensuring adherence to research protocols and ethical standards.
- Conduct data quality checks, including daily data reviews, validation, spot checks, and follow-up on fieldwork issues.
- Conduct quantitative and qualitative research activities, including surveys, FGDs, KIIs, and stakeholder consultations.
- Analyse data using SPSS and Excel, and translate findings into practical insights for clients and management.
- Prepare research reports, presentations, insight briefs, and evidence-based recommendations.
- Support proposal writing, research design, and development of tools for new research assignments.
- Supported project planning, budgeting inputs, client deliverables, proposal development, and coordination of research timelines to ensure assignments were delivered within scope, quality standards, and agreed deadlines.

Key Projects

- KCB Brand Asset Evaluation Study – Assessed sponsorship impact, brand visibility, and customer engagement.
- KCB Women in Banking Impact Study – Evaluated financial inclusion outcomes among women entrepreneurs.
- Boost Africa Campaign Evaluation — EU/EIB – Supported CATI-based evaluation on campaign reach and effectiveness.
- Twaweza Sauti za Wananchi Surveys – Contributed to national public opinion surveys on governance and socio-economic issues.

- Lake Turkana Wind Power Communications and PR Strategy Evaluation – Supported research informing a national-level communication strategy.
- Conducted and supported multiple national opinion polls and research studies across governance, financial inclusion, energy, and livelihoods sectors.

Key Achievements

- Trained and supervised over 50 research assistants and enumerators on data collection tools, research ethics, and survey procedures.
- Supported delivery of high-impact national surveys, public opinion studies, market research assignments, and programme evaluations.
- Contributed to research outputs used by clients to inform business strategy, policy discussions, programme improvement, and communication planning.
- Strengthened data quality through structured field supervision, validation, data checks, and timely issue resolution.

HOPE Worldwide Kenya

Data Assistant

October 2021 – May 2024

- Supported M&E activities under the DREAMS Program, a donor-funded programme focused on vulnerable adolescent girls and young women.
- Coordinated routine data collection, entry, verification, validation, and reporting across programme sites.
- Conducted routine data quality audits, data clean-up exercises, and corrective action tracking.
- Monitored programme indicators and supported performance reviews against targets.
- Prepared weekly, monthly, and quarterly reports for programme staff, sub-county health teams, and donors.
- Participated in beneficiary feedback reviews and continuous quality improvement processes.
- Supported programme assessments and evaluation activities through data collection, analysis, and documentation.
- Conducted capacity-building sessions for programme staff on reporting standards, data quality requirements, and information management.
- Ensured data protection, confidentiality, and proper management of programme records.

Key Achievements

- Improved data quality and reporting accuracy through routine validation and verification processes.
- Led multiple data quality audits and supported follow-up on corrective actions.
- Maintained timely reporting compliance across project sites.

LVCT Health

Data Clerk

November 2020 – September 2021

- Managed data entry and service delivery reporting for donor-funded health programmes.
- Conducted data audits, document reviews, and verification activities to ensure complete and accurate records.
- Supported routine data quality assessments and validation exercises.
- Prepared monthly performance summaries and reports for programme teams.
- Ensured consistency and accuracy of client records and programme databases.
- Supported data-driven programme decision-making through regular reporting and analysis.

Key Achievement

- Achieved 100% reporting compliance and contributed to improved data quality across supported facilities.

KEY CONSULTING & RESEARCH ACHIEVEMENTS

- Led and supported research projects across finance, energy, governance, consumer markets, health, and social development.
- Delivered national surveys and public opinion studies that informed policy, programme, and business decisions.
- Supported impact evaluations and campaign evaluations for donor-funded and private sector assignments.
- Improved data quality through structured supervision, validation, back-checks, and routine data reviews.
- Trained and supervised over 50 research staff and enumerators.
- Produced reports, presentations, and insight briefs that translated complex findings into simple, actionable recommendations.

TECHNICAL SKILLS

Data Analysis & Tools

- SPSS
- Advanced Excel
- Data Cleaning and Validation
- Data Analysis and Insight Generation

Survey Platforms

- SurveyToGo
- ODK
- CATI
- CAWI

Research & M&E Systems

- Research Design
- Survey Design
- M&E Framework Development
- Impact Evaluation

- Data Quality Audits
- Report Writing
- Data Storytelling
- Presentation of Findings

Project & Field Management

- Fieldwork Coordination
- Team Supervision
- Enumerator Training
- Stakeholder Engagement
- Client Reporting
- Project Progress Tracking

CAPACITY BUILDING & TRAINING

- Trained over 50 research assistants and field staff on data collection tools, research ethics, survey procedures, and quality assurance standards.
- Facilitated training sessions on data quality, M&E systems, reporting tools, and fieldwork protocols.
- Supported field teams to understand research tools, sampling instructions, interview procedures, and data submission requirements.

PROFESSIONAL DEVELOPMENT

- Monitoring and Evaluation, KIMS College – January 2026 (Ongoing)
- Project Management, University of Washington – August 2020
- HIV Monitoring and Evaluation Tools Training, NASCOP – September 2020
- Gender and Sexual Diversity, Global Health eLearning – September 2020
- ART Cohort Analysis, NASCOP – September 2021

EDUCATION

Bachelor of Economics and Statistics

University of Nairobi

2015 – 2019

Second Class Honours
